

Appendix 1: Comparative Eye-Movement Heat Maps

In the last academic year (2013- 2014) VisualReading is being piloted and researched in Italy. These are eye-movement heat maps taken while reviewing a page of reading

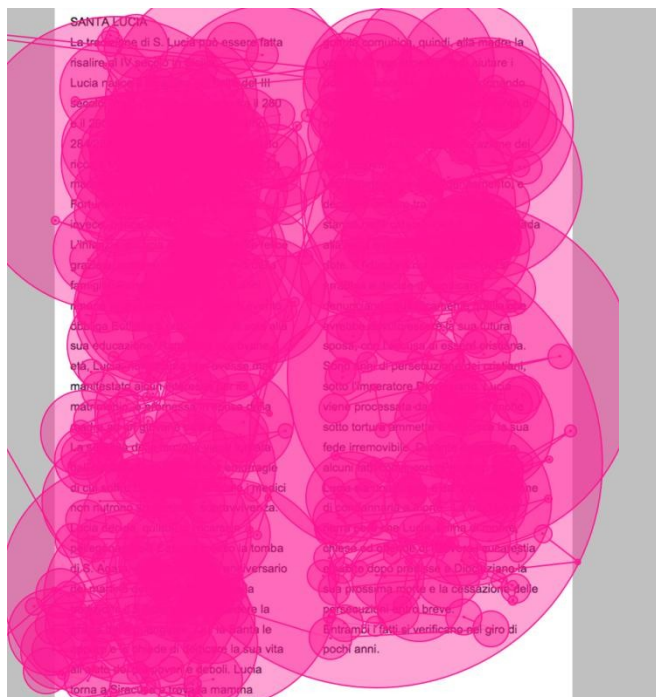

Non-Dyslexic Reader reviewing a page

The same dyslexic reader after VisualReading

Last 15 seconds

The change in the heat map shows both better eye-control and better review strategy. More than 7 out of 10 dyslexic VisualReaders are now better readers than their teachers.
